

HF Stationary Medical Diagnostic X-Ray Machine

Model: TR30N-DR

DR digital imaging:

Features:

1. Model TR30N-DR, with Chinese 1717X wired flat panel detector to achieve digital type
2. With energy-storing device, can work properly at 220V, very convenient
3. 32kW 125kV 400mA Radiographic machine

Main Technical Parameter:

Model		TR30N-DR
Power supply		AC220V±10%, 50/60Hz
Working frequency		30kHz
Max. Power		Max. output power 32kW
X-ray tube component		Chinese tube, Rotating anode, Double focus: 1.0mm/2.0mm
Radiographic	kV :	40kV~125kV
	mA :	32mA~400mA
	mAs :	0.32mAs~400mAs
Exposure time range		0.002s~10s
Radiographic table		2100mm×825mm×655mm Longitudinal movement range: ≥825mm, Horizontal movement range: ≥250mm
Tube stand		Longitudinal movement range: ≥1575mm Horizontal rotating range: ±180°, Vertical rotating range: ±90° Distance from focus spot to film: ≥1200mm, Locking way: Electromagnetic lock
X-ray grid		Fixed, Grid density: 103L/cm, Grid ratio: 10:1, Focus distance: 1000mm
Vertical cassette stand		Vertical Travel ≥1000mm and minimum floor to focus distance of ≤800mm, The film size: no more than 17"x17", Bucky: f0=180cm, r=10:1, density: N=103Lines/Inch
1717X Wired Flat Panel Detector		Wired Flat Panel Detector (Made in China, model: 1717X)
		Detector Technology: Amorphous Silicon
		Scintillator: CSI
		Active Area: 17"x17"
		Pixel Pitch: 139um
		Number of Pixels: 3072x3072
		Spatial resolution: 3.6lp/mm
		AD Conversion: 16bits
		Preview Image: ≤3s
		Full Image: ≤5s
		Data Interface / Detector Control: Ethernet
		Trigger Mode: Prep/ Software / Option: AED
		Degree of Protection: IPX3
		Dimension: 460x460x15mm
		Weight: ≤4.0kg
		Power Consumption: 25W

Supplementary parameters:

1. Anode:

Rotating with velocity of 3000 rpm

2. Thermal characteristics:

- a. Tube heat capacity: 150 kHU
- b. Over temperature protection

3. Collimation system:

- a. Multi-leaf
- b. Manually controlled
- c. With LED field lamp and crosshair centering.
- d. Rotation: $\pm 45^\circ$
- e. With built-in retractable distance measuring device 2 meters

4. X-Ray Table:

- a. Table to support patient weight of up to 180 kg.
- b. Tabletop height: 650mm

5. Movable bucky assembly with grid:

- a. Grid ratio: 10:1
- b. Grid frequency: 27 lines/cm
- c. Focal distance: 100 cm

6. Control Unit:

- a. Microprocessor controlled with control system integrated
- b. Password protected operation of the equipment
- c. Radiation Exposure Hand Switch: 2- Phase (ready and expose) in dead-man type

7. Flat Panel Detector:

- a. Geometrical fill factor $\geq 65\%$
- b. Peak Detective Quantum (DQE) $\geq 65\%$ at 0.05 lp/mm
- c. Weight bearing capacity : ≥ 100 kg.
- d. Protection grade: IPX3

8. Image Acquisition:

(1).Image display monitor: 15 inch LCD, 3 megapixel resolution, anti-reflective screen with contrast and brightness adjustments and be capable of color and gray scale display of 10 bits.

(2).Imaging Software Capabilities

- a. Software for patient ID entry, viewing, processing of image, storage, printing and documentation
- b. Display of exposure indicators
- c. Display of patient data and actual exposure technique factors used
- d. Automatic recognition of detectors
- e. Anatomical programs included.
- f. Allows the pre-visualization of the image in less than 5s
- g. Measured (not calculated) Patient Dose-Area Product (DAP)

Supplementary parameters:

- h. Image analysis tools (Distance Measurement, ROI, Exposure Index (DDI), Mean Pixel value, PVSD measurement, contrast adjustment, annotations, rotation, zoom, crop, grayscale inversion)
- i. Image processing functionality (window/level adjustment, Reverse Contrast mapping, Edge Enhancement, Dynamic range Control)
- j. Image reject folder
- k. With the respective keys and software installer on CD/DVD/USB
- l. Export of image files or explorations in JPG, TIF and BMP formats
- (3). Interface capability: compliant with DICOM 3 and is capable of online (Wifi with PACS) and offline (computed radiography with workstation or film and darkroom) operation
- (4). DICOM standard connectivity, compatible with radiological image viewing, post-processing, storage, verification, send/receive and printing software.
- (5). Internal database storage of 2,000 images

9. Connectivity

- a. One USB outlet for image storage on external media
- b. Ethernet connection RJ45 for image transmission
- c. DICOM standard connectivity, compatible with radiological image viewing, post-processing, storage and printing software (Functions: Storage, storage commitment, send/receive, print, modality worklist management, modality performed procedure step and verification)
- d. The equipment can be connected by the supplier to the hospital PACS during the installation phase

High Quality Image:
